Sensorflush

It's not just about a *beautifully* crafted touchpad.

Corian Range

Corian is a seamless material comprising a blend of natural minerals and pure acrylic polymer manufactured by DuPont.

Corian is known for its strength, purity and reliability, it offers longevity, durability and is hygienic.

The *Sensorflush* range of Corian Touchpads offer modern design, 21st century technology and a modern alternative to the standard flush button.

This stylish, discreet touchpad can blend quietly into the decor or can be used as a feature, while operating the in wall valve, it eliminates the need for an external cistern, freeing up valuable bathroom space.

A choice of contemporary colours, from minimalist white to models inlayed with gold or silver.

Stainless Steel Range

We believe that not only does the toilet flush system need to flush efficiently to meet varied requirements, but in some environments, it also needs to be strong, resilient and vandal resistant as well as modern and functional in its design.

Engineered to last, the *Sensorflush* touchpad coupled with the low maintenance flush valve is 4 Star WELS rated and is also suited for use with 3 Star WELS rated pans. The patented touch technology, and flush products have been considered leaders in their field since 1992.
